**The Suffering of Light** Alex Webb, Geoff Dyer, 2011 Review The images - rich in color and visual rhythm - span 30 years and several continents. Of course, Haiti and the Mexican border are well represented, locales that opened up a new way to see. He has been able to render Haiti - a place often depicted for its chaos - with a precise eye, finding personal moments that are as still as they are complex. He can use shadows as skillfully as a be-bop musician to set the tempo. The people in his frames can look like dwarfs being stomped on by giant, disembodied feet. He can make an American street seem far more foreboding than any Third World slum. (David Gonzalez The New York Times 2011-12-18) A 30-year retrospective of a great, and often overlooked, American pioneer of colour photography who pays scant regard to genre boundaries, merging art photography, photojournalism and often complex street photographs. (Sean O'Hagan The Guardian 2011-12-13) In far-flung corners of the globe, Webb captures glimpses of beauty in impoverished lives and stoicism in the face of strife. (Jack Crager American Photo 2011-12-01).

**Thoughts on Design** Paul Rand, 2014-08-19 One of the seminal texts of graphic design, Paul Rand's Thoughts on Design is now available for the first time since the 1970s. Writing at the height of his career, Rand articulated in his slender volume the pioneering vision that all design should seamlessly integrate form and function. This facsimile edition preserves Rand's original 1947 essay with the adjustments he made to its text and imagery for a revised printing in 1970, and adds only an informative and inspiring new foreword by design luminary Michael Bierut. As relevant today as it was when first published, this classic treatise is an indispensable addition to the library of every designer.

**Signal and Noise in Geosciences** Martin H. Trauth, 2021-11-06 This textbook introduces methods of geoscientific data acquisition using MATLAB in combination with inexpensive data acquisition hardware such as sensors in smartphones, sensors that come with the LEGO MINDSTORMS set, webcams with stereo microphones, and affordable spectral and thermal cameras. The text includes 35 exercises in data acquisition, such as using a smartphone to acquire stereo images of rock specimens from which to calculate point clouds, using visible and near-infrared spectral cameras to classify the minerals in rocks, using thermal cameras to differentiate between different types of surface such as between soil and vegetation, localizing a sound source using travel time differences between pairs of microphones to localize a sound source, quantifying the total harmonic distortion and signal-to-noise ratio of acoustic and elastic signals, acquiring and streaming meteorological data using application programming interfaces, wireless networks, and internet of things platforms, determining the spatial resolution of ultrasonic and optical sensors, and detecting magnetic anomalies using a smartphone magnetometer mounted on a LEGO MINDSTORMS scanner. The book's electronic supplementary material (available online through Springer Link)

contains recipes that include all the MATLAB commands featured in the book, the example data, the LEGO construction plans, photos and videos of the measurement procedures.

**Oh Crap! Potty Training** Jamie Glowacki,2015-06-16 From potty-training expert and social worker Jamie Glowacki, who's already helped over half a million families successfully toilet train their preschoolers, comes a newly revised and updated guide that's "straight-up, parent-tested, and funny to boot" (Amber Dusick, author of Parenting: Illustrated with Crappy Pictures). Worried about potty training? Let Jamie Glowacki, potty-training expert, show you how it's done. Her six-step, proven process to get your toddler out of diapers and onto the toilet has already worked for tens of thousands of kids and their parents. Here's the good news: your child is probably ready to be potty trained EARLIER than you think (ideally, between 20-30 months), and it can be done FASTER than you expect (most kids get the basics in a few days—but Jamie's got you covered even if it takes a little longer). If you've ever said to yourself: -How do I know if my kid is ready? -Why won't my child poop in the potty? -How do I avoid "potty power struggles"? -How can I get their daycare provider on board? -My kid was doing so well—why is he regressing? -And what about nighttime?! Oh Crap! Potty Training can solve all of these (and other) common issues. This isn't theory, you're not bribing with candy, and there are no gimmicks. This is real-world, from-the-trenches potty training information—all the questions and all the answers you need to do it once and be done with diapers for good.

**American Geography** Matt Black,2021-12-07 Award-winning photographer Matt Black traveled over 100,000 miles to chronicle the reality of today's unseen and forgotten America. When Magnum photographer Matt Black began exploring his hometown in California's rural Central Valley—dubbed “the other California,” where one-third of the population lives in poverty—he knew what his next project had to be. Black was inspired to create a vivid portrait of an unknown America, to photograph some of the poorest communities across the US. Traveling across forty-six states and Puerto Rico, Black visited designated “poverty areas,” places with a poverty rate above 20 percent, and found that poverty areas are so numerous that they're never more than a two-hour's drive apart, woven through the fabric of the country but cut off from “the land of opportunity.” *American Geography* is a visual record of this five-year, 100,000-mile road trip, which chronicles the vulnerable conditions faced by America's poor. This compelling compilation of black-and-white photographs is accompanied by Black's own travelogue—a collection of observations, overheard conversations in cafe's and public transportation, diner menus, bus timetables, historical facts, and snippets from daily news reports. A future classic of photography, this monograph is supported by an international touring exhibition and is a must-have for anyone with an interest in witnessing the reality of an America that's been excluded from the American Dream.

**Digital Photography For Dummies** Julie Adair King,2020-02-05 Photographers! Your guide is here! The demand for high-quality photographs is higher than ever. Whether you're building your influencer rating online, capturing the moments of a child's life, or are looking for ways to improve your skills, photography know-how is a must-have skill. *Digital Photography For Dummies* helps you do more than pointing, shooting, and hoping for the best or slapping a filter on a camera phone shot. This book introduces you to the camera settings and techniques that separate okay pictures from frame-worthy portraits. It then explains how to apply those skills to capturing your own portraits, landscape shots, and high-action photos. Develop a better eye for image composition Discover how to light photos better, including using natural light Learn to get quick results in auto settings or take full control in manual mode Discover the elements of exposure and how they influence the final product Find instructions on taking a formal or casual portrait Apply basic editing techniques to finalize your image Go beyond photo apps and apply the techniques pros use for their images.

*The Five Ways We Grieve* Susan A. Berger,2011-03-08 In this new approach to understanding the impact of grief, Susan A. Berger goes beyond the commonly held theories of stages of grief with a new typology for self-awareness and personal growth. She offers practical advice for healing from a major loss in this presentation of five basic ways, or types, of grieving. These five types describe how different people respond to a major loss. The types are: • Nomads, who have not yet resolved their grief and don't often understand how their loss has affected their lives • Memorialists, who are committed to preserving the memory of their loved ones by creating concrete memorials and rituals to honor them • Normalizers, who are committed

to re-creating a sense of family and community • Activists, who focus on helping other people who are dealing with the same disease or issues that caused their loved one's death • Seekers, who adopt religious, philosophical, or spiritual beliefs to create meaning in their lives Drawing on research results and anecdotes from working with the bereaved over the past ten years, Berger examines how a person's worldview is affected after a major loss. According to her findings, people experience significant changes in their sense of mortality, their values and priorities, their perception of and orientation toward time, and the manner in which they fit in society. The five types of grieving, she finds, reflect the choices people make in their efforts to adapt to dramatic life changes. By identifying with one of the types, readers who have suffered a recent loss—or whose lives have been shaped by an early loss—find ways of understanding the impact of the loss and of living more fully.
