Heat-power Engineering William Nichols Barnard, Frank O. Ellenwood, Clarence Floyd Hirshfeld, 1926 *Before and Beyond Divergence* Jean-Laurent Rosenthal, R. Bin Wong, 2011-04-01 China has reemerged as a powerhouse in the global

economy reviving a classic question in economic history why did sustained economic growth arise in Europe rather than in China Many favor cultural and environmental explanations of the nineteenth century economic divergence between Europe and the rest of the world This book the product of over twenty years of research takes a sharply different tack It argues that political differences which crystallized well before 1800 were responsible both for China s early and more recent prosperity and for Europe s difficulties after the fall of the Roman Empire and during early industrialization Rosenthal and Wong show that relative prices matter to how economies evolve institutions can have a large effect on relative prices and the spatial scale of polities can affect the choices of institutions in the long run Their historical perspective on institutional change has surprising implications for understanding modern transformations in China and Europe and for future expectations It also yields insights in comparative economic history essential to any larger social science account of modern world history
